The new ISO standard for liferafts is now in force for all liferaft manufacturers to comply to. Seago have been working behind the scenes to bring our current range of liferafts up to the new and latest requirements.

The Cruiser Plus ISO 9650-1 TYPE 2 is the latest version of our best selling leisure liferaft complying to the newest ISO standard. This new version of the liferaft has had a new boarding ramp installed in place of the weighed ladder and comes packed in a new design valise or slimline canister with new polished finish. The Cruiser Plus has twin butyl rubber chambers which are independent of each other if one was to puncture the raft will still float with the full capacity of people on board. The canopy is high visibility rip stop nylon which is highly waterproof and strong.

Canister

PART NUMBER	MODEL	CAPACITY	DIMENSIONS LxWxH (mm)	WEIGHT (kg)	EAN NUMBER
4C-CRUISER PLUS	Canister	4 Person	680x430x260	35	5060518262357
